SUSTAINABLE FINANCELIVE 2026 · TEAM TWO · PS1

Springforth

Coordinate first. Community plans, “I want to…” declarations and funding pledges become coordinated commitments — activated at quorum, evidenced on a hash-chained ledger.

Live: springforth.widespread.workers.dev

MIT-open · github.com/TerexitariusStomp/springforth

THE COORDINATION GAP

Plans live in different systems. Overlap stays invisible until it’s too late.

Surface → declare a possibility

Match → quorum + overlap detection

Fund → demand-gated pledges

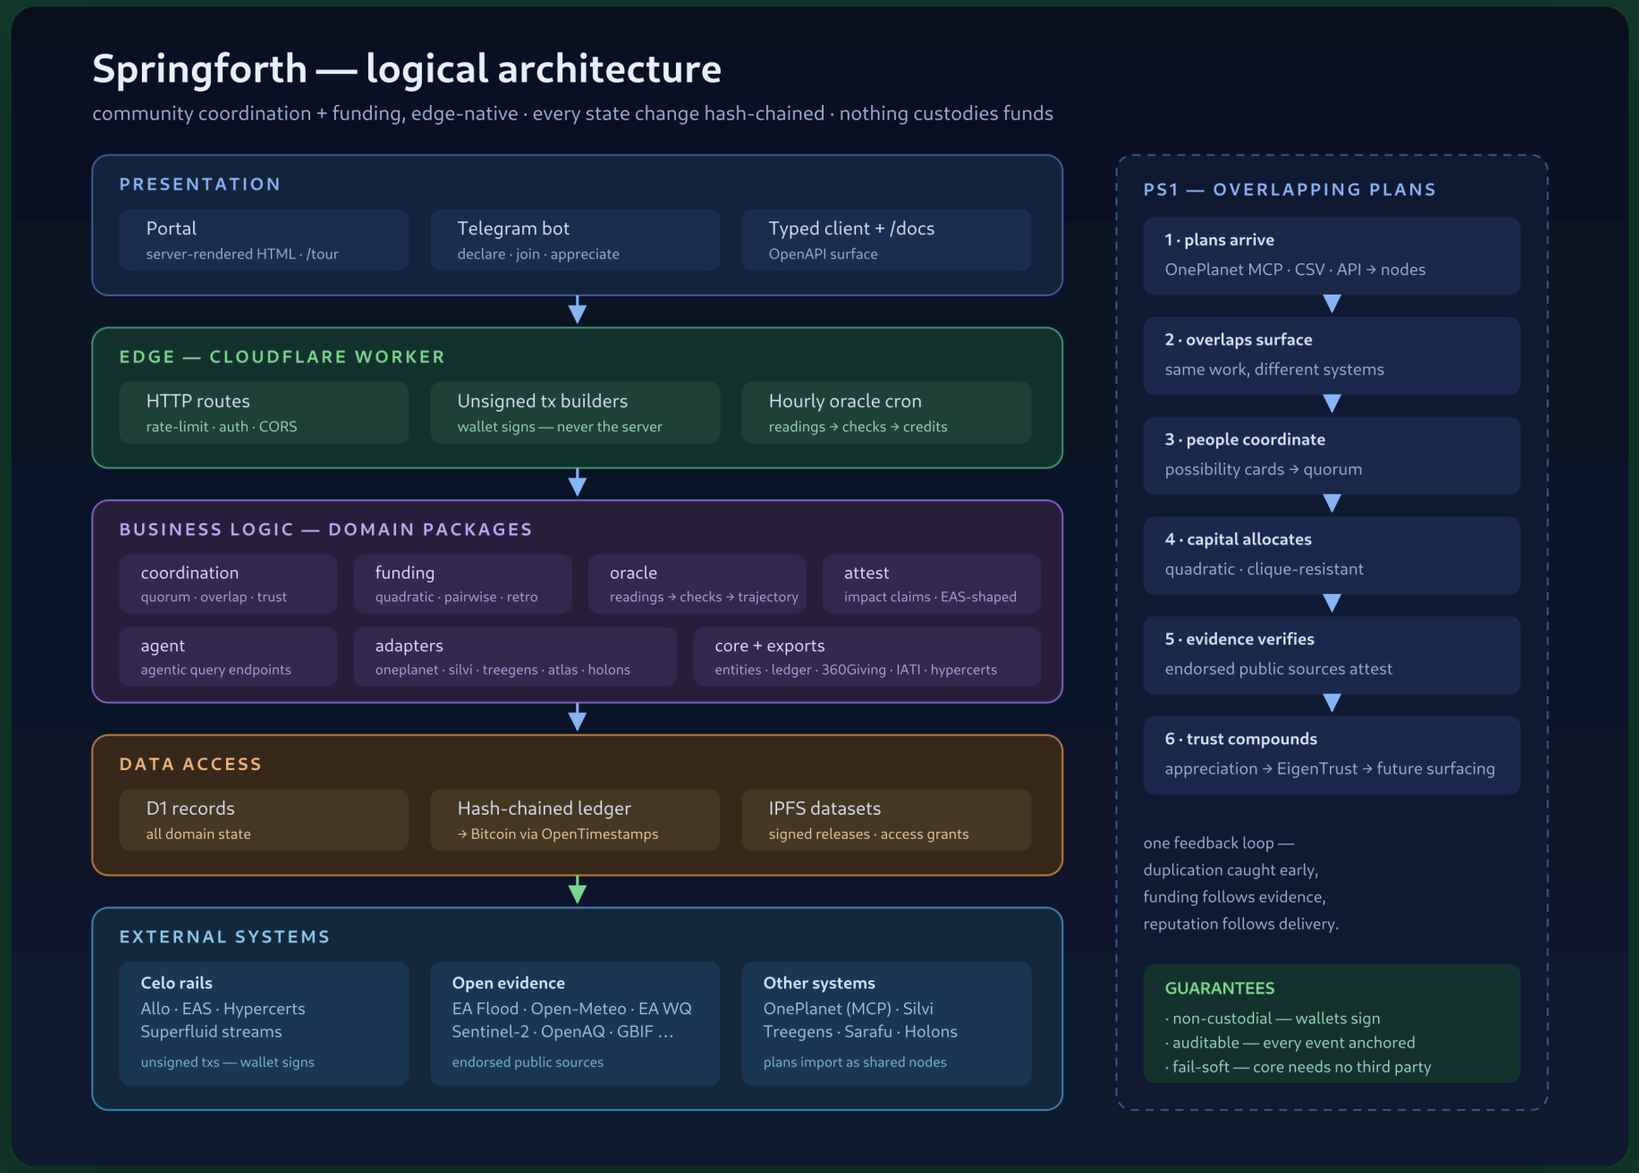

Deliver → reports + appreciation

Measure → oracle checks + ledger

Steward → council seats at quorum

YOUR OWN MODEL

The bootcamp’s marketplace for community liquidity — Surface, Match, Fund, Deliver, Measure, Steward — is literally this lifecycle. Springforth is that layer, running.

Coordination kernel → evidence lane → funding lane → stewardship. Ten seconds.

LIVE ON PRODUCTION — NOT A MOCKUP

The demo, in six legs

Feed	reason lines + signals — /possibilities
Card	quorum, council, value — click a card
Overlap	4 pursuing one outcome — /collaborate
Evidence	endorsed sources — /impact
Funding	demand-gated rounds — /fund
Audit	map + ledger-verify

Audience quorum card — scan, join, watch it activate.

springforth.widespread.workers.dev

TREASURER-GRADE VALUE

Four capitals, kept distinct — every figure replayable from the ledger.

Financial committed + matched **Human** volunteer hours at ONS rates

Social in-kind, never converted **Natural** risk-avoided, e.g. £360k flood

Coordinated value (est.) — money mobilized, cost avoided, benefit created — ISO 14008-aligned, sources cited:

▼ GBP **£584.87** (×4.33 mobilization) value mobilized

Impacts: £335.00 financial · £129.87 human · £120.00 social

damages avoided: est. £360,000.00 (natural-capital risk avoided) — est. £616.00 per £1.00

Dependencies — cost of the ask: £150.00

▼ re-derive this figure

committed — donations on the ledger
matched — matching-fund allocation
in-kind — declared offer budgets
asked — declared need budgets (cost, not yet covered)
volunteer time — 9h declared × GBP 14.43/h (ONS Household Satellite Accounts (2017))
risk mitigated — 12 homes declared × GBP 30000/home (Environment Agency / ABI (2025))
mobilization — 135 committed → 584.87 coordinated (×4.33)
benefit-cost — est. 615.52 risk mitigated per unit coordinated

Capitals Coalition frame — impacts and dependencies across financial, human, social and natural capital.

methodology

USE OF DATASETS

Endorsed sources, read hourly — honestly tiered.

OPEN DATA

Data for everyone · 3

Signed, anchored releases of the underlying records, plus the slices that are always live.

SOURCE	LICENSE	METHOD / CITATION	STATUS	DATE
OpenAQ v3 — reference-grade air quality	per-location CC0/CC-BY/gov	latest() aggregate; CRF ref: WHO AQG 2021	key-gated `OPENAQ_API_KEY`	2026-10-22
Sensor.Community — crowd AQ sensors	ODbL (attribution + share-alike)	nearby sensor mean PM2.5	live	2026-10-22
NASA POWER — meteorology reanalysis	open, any use	MERRA-2 reanalysis grid, daily precip sum	live	2026-10-20
earth-search STAC — Sentinel-2 scenes	Copernicus open	NDVI from band reflectance; cloud-filtered scenes	live	2026-10-20
World Bank — socioeconomic indicators	CC-BY-4.0	WDI indicator lookup by country	live	2026-10-26
GBIF — biodiversity occurrences (CC0/CC-BY only)	CC0/CC-BY filtered	occurrence count within radius; license-filtered	live	2026-10-20
envhealth-atlas — hazard model	project data	deterministic hazard model (SQL + published coefficients)	live	2026-10-06
Treegens — filmed, AI-counted planting records	site-published evidence	filmed planting records, AI-verified counts	live	2026-10-23

Live badges are keyless reads; key-gated rows are labelled — that honesty is the credibility beat.

BUSINESS MODEL + FEASIBILITY

Revenue where value already moves

SETTLEMENT FEE

Funder-side fee on matched rounds — no new behaviour required.

HOSTED DEPLOYMENTS

Councils and partnerships run their own coordination instance.

DATASET REVENUE

Consented, ledger-anchored audit corpus — sold only when worth selling.

Non-custodial by construction — the only money we touch is the fee. Pilot path: BRP in the UK, a Sarafu community in Kenya; the seed data already spans both.

FEASIBILITY — IT RUNS NOW

7,123

ledger events, hash-chained — /ledger/verify green

3,689

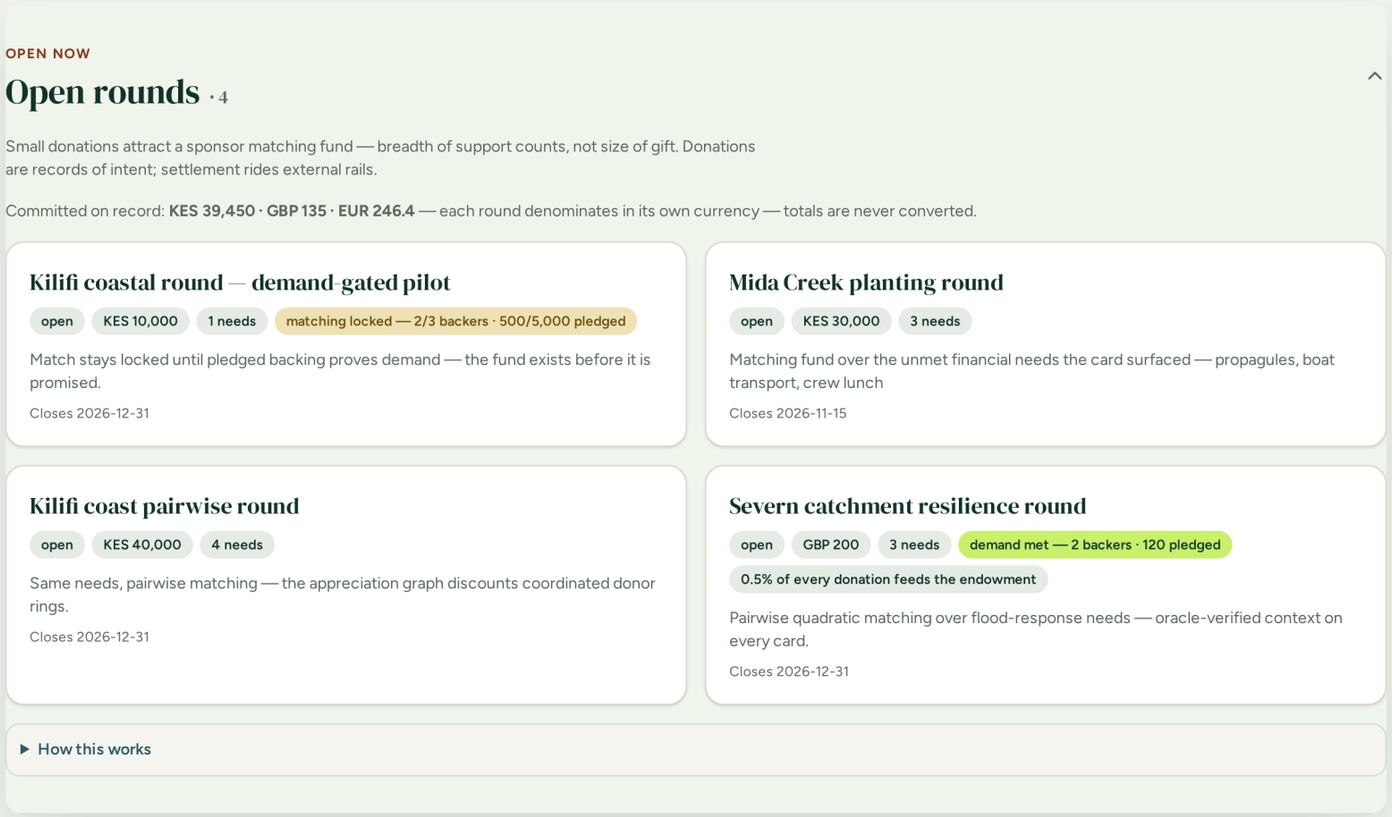

plan nodes — OnePlanet, Sarafu, Treegens, council CSVs

2

countries live — UK flood response + Kenya mangroves

186

real field-evidence pins on /map

WHY THIS WINS

The coordination problem that motivated this build is the one we sell the fix for.

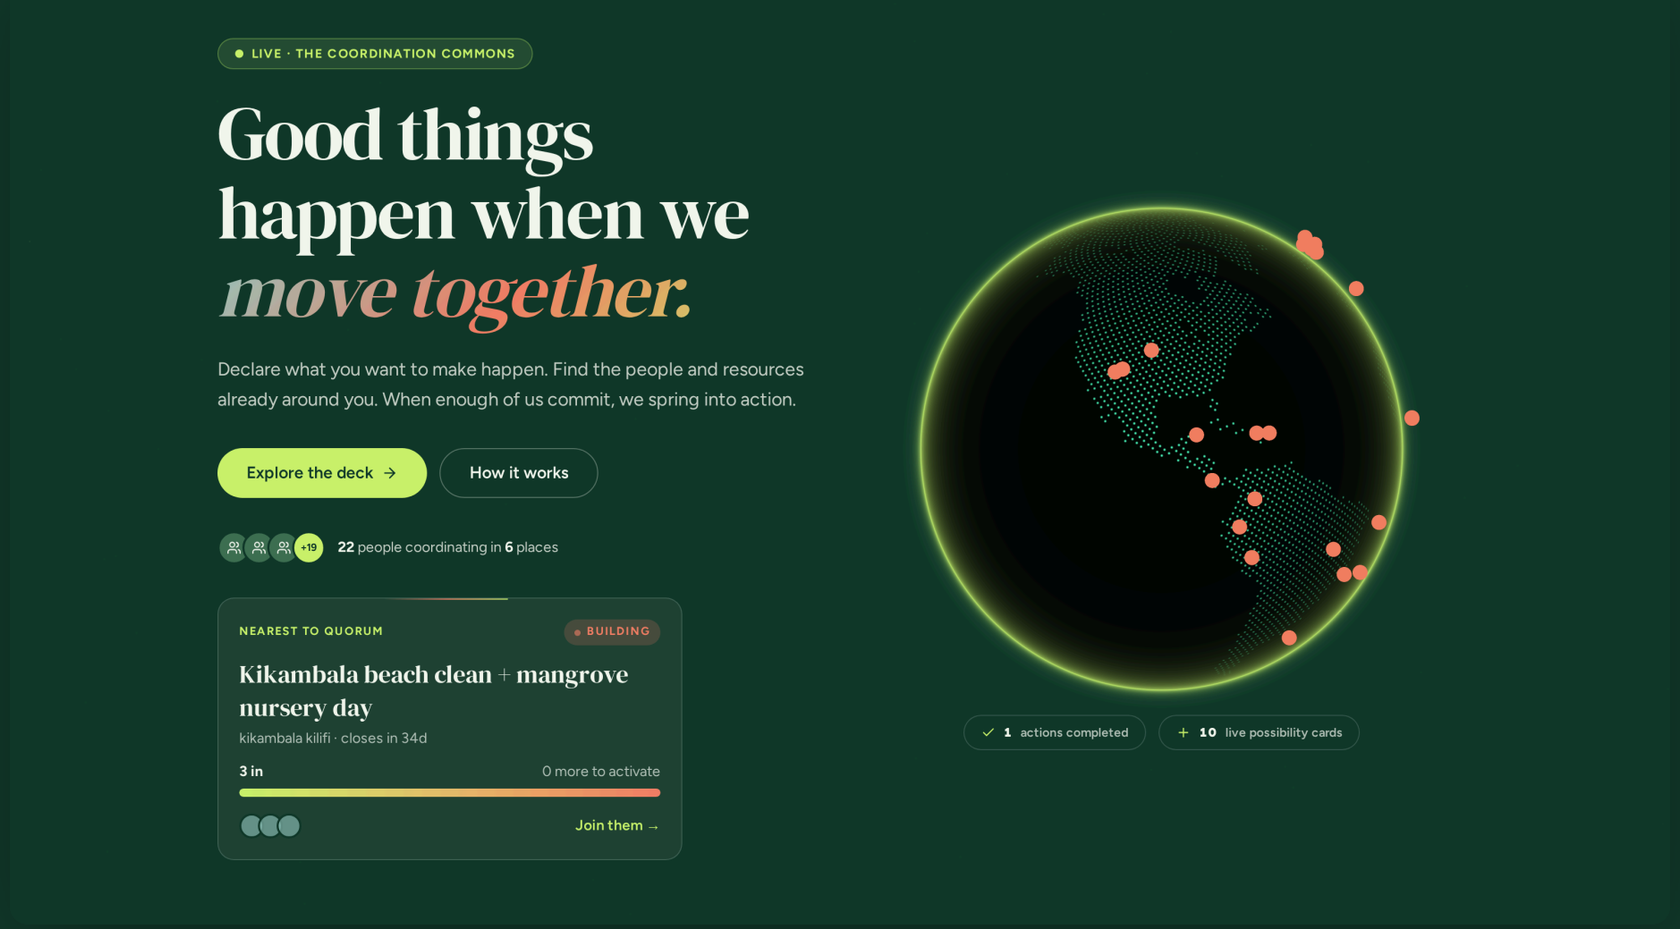

Demo, business idea, technical implementation, datasets, feasibility, scalability, impact — answered live, on a ledger any reviewer can replay.

Q & A

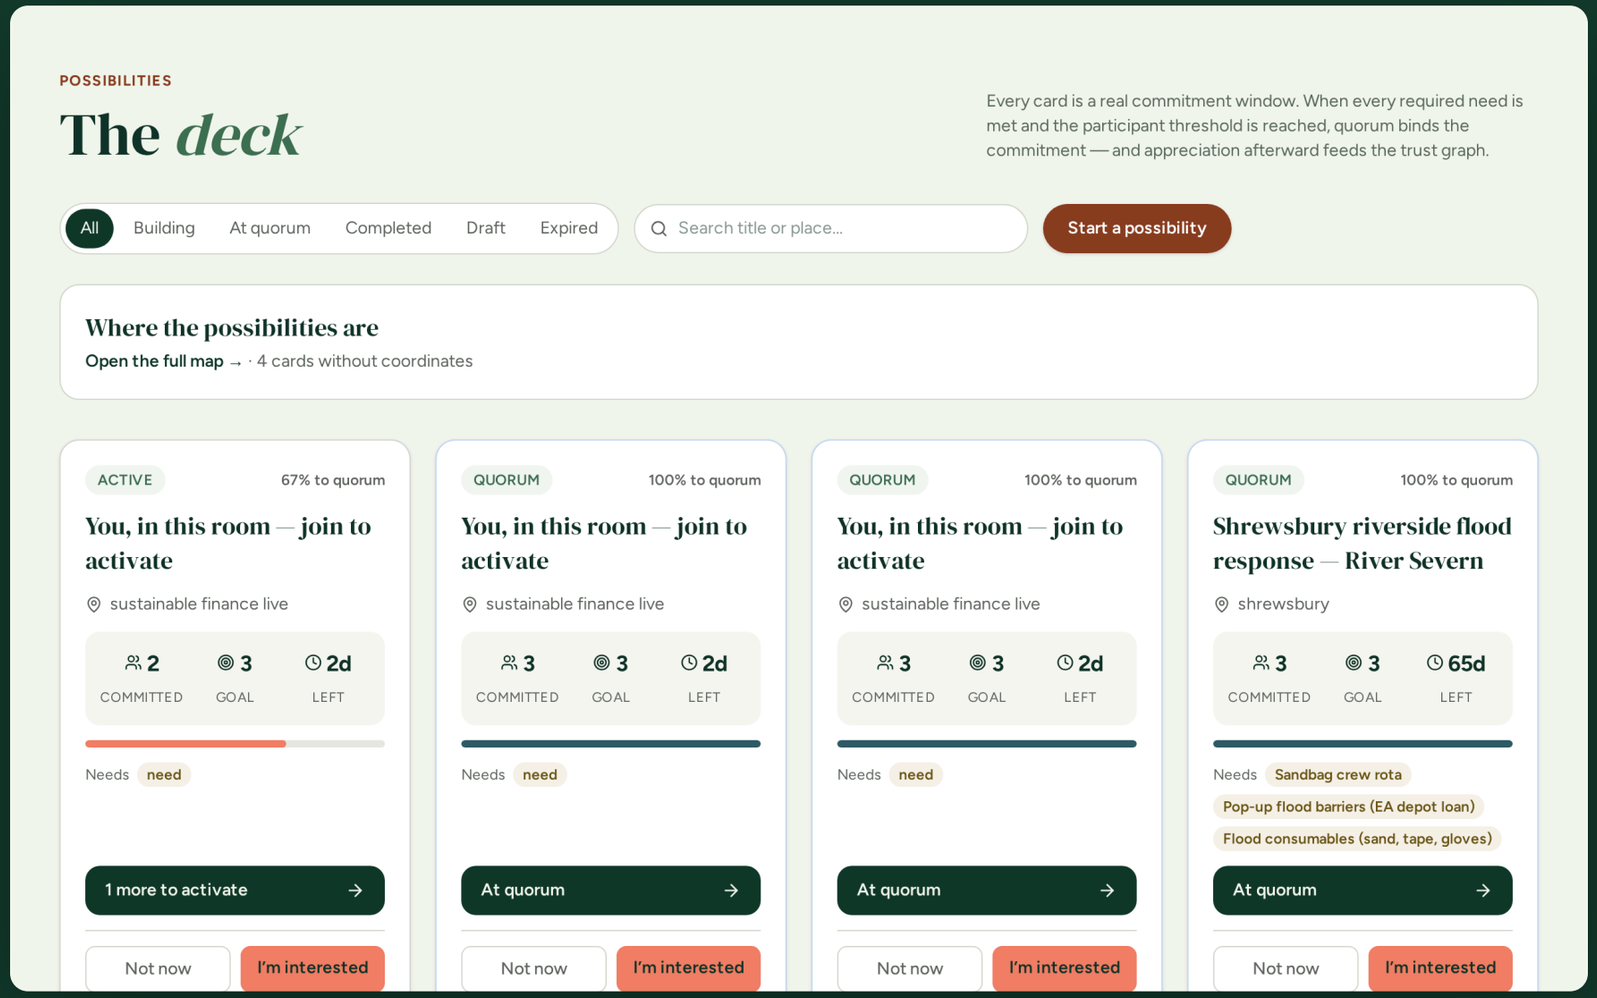

Everything is inspectable.

Demo	springforth.widespread.workers.dev — /how-it-works self-serve
Code	github.com/TerexitariusStomp/springforth — MIT-clean
Ledger	/ledger/verify — hash chain, live
Value	/impact — per-currency, never converted

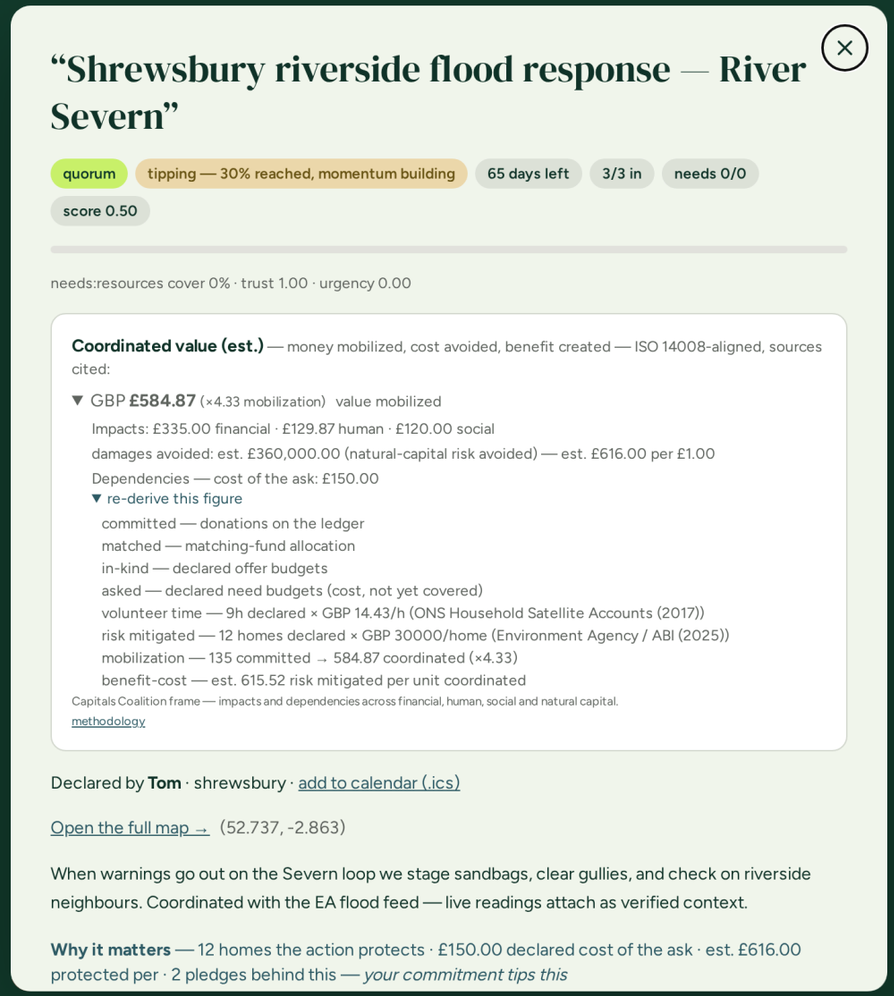

IF THE DEMO FAILS — SAME BEATS, ON SCREENSHOTS

1 · Landing — live stats in the hero.

2 · Possibilities feed — reason lines, interest signals, since-engagement badges.

3 · Quorum card — council, forum, audit trail, value block with verifier-replay.

SHARED GOALS

Shared goals · 221

Who else is pursuing each outcome, and which existing actions could strengthen it — every entry traces to its source plan.

Restored mangrove cover and fish-nursery habitat at Mida Creek

4 pursuing this outcome · proposed

Who: Restored mangrove cover and fish-nursery habitat at Mida Creek (csv:kilifi-county · Kilifi County Government), Restored mangrove cover and fish-nursery habitat at Mida Creek (oneplanet:plan-mida-creek), Restored mangrove forest cover — Kisiwani, Mida Creek (treegens:archive · treegens), Restored mangrove forest cover — Mida, Dabaso (treegens:archive · treegens)

Actions that could strengthen it:

Shoreline mangrove planting on the creek edge — csv:kilifi-county · 2027-02-01

Mangrove propagule nursery establishment — oneplanet:plan-mida-creek · 2026-11-01

Shoreline planting days — 1,200 propagules — oneplanet:plan-mida-creek · 2027-01-15

48,099 mangrove trees — Kisiwani, Mida Creek — treegens:archive

16,600 mangrove trees — Mida, Dabaso — treegens:archive

Local and sustainable food

2 pursuing this outcome · proposed

Who: Local and sustainable food (oneplanet:0da8c349-fc4e-4640-9118-7e5b0c08bca1), Local and sustainable food (oneplanet:ab158340-9bd7-49c0-80e2-6b009cf2de83)

Actions that could strengthen it:

4.3 Develop Local Regenerative Food System Infrastructure — oneplanet:ab158340-9bd7-49c0-80e2-6b009cf2de83

7.4 Support and Expand Local Composting Opportunities — oneplanet:ab158340-9bd7-49c0-80e2-6b009cf2de83

5.2 Develop Community-Led Local SME Food System Model — oneplanet:ab158340-9bd7-49c0-80e2-6b009cf2de83

Indicators: 8.4 Investment Secured for Food Work, 8.5 Funding Secured for Whole Systems Food Work

4 · /collaborate#outcomes — four plans pursuing one outcome, Treegens footage.

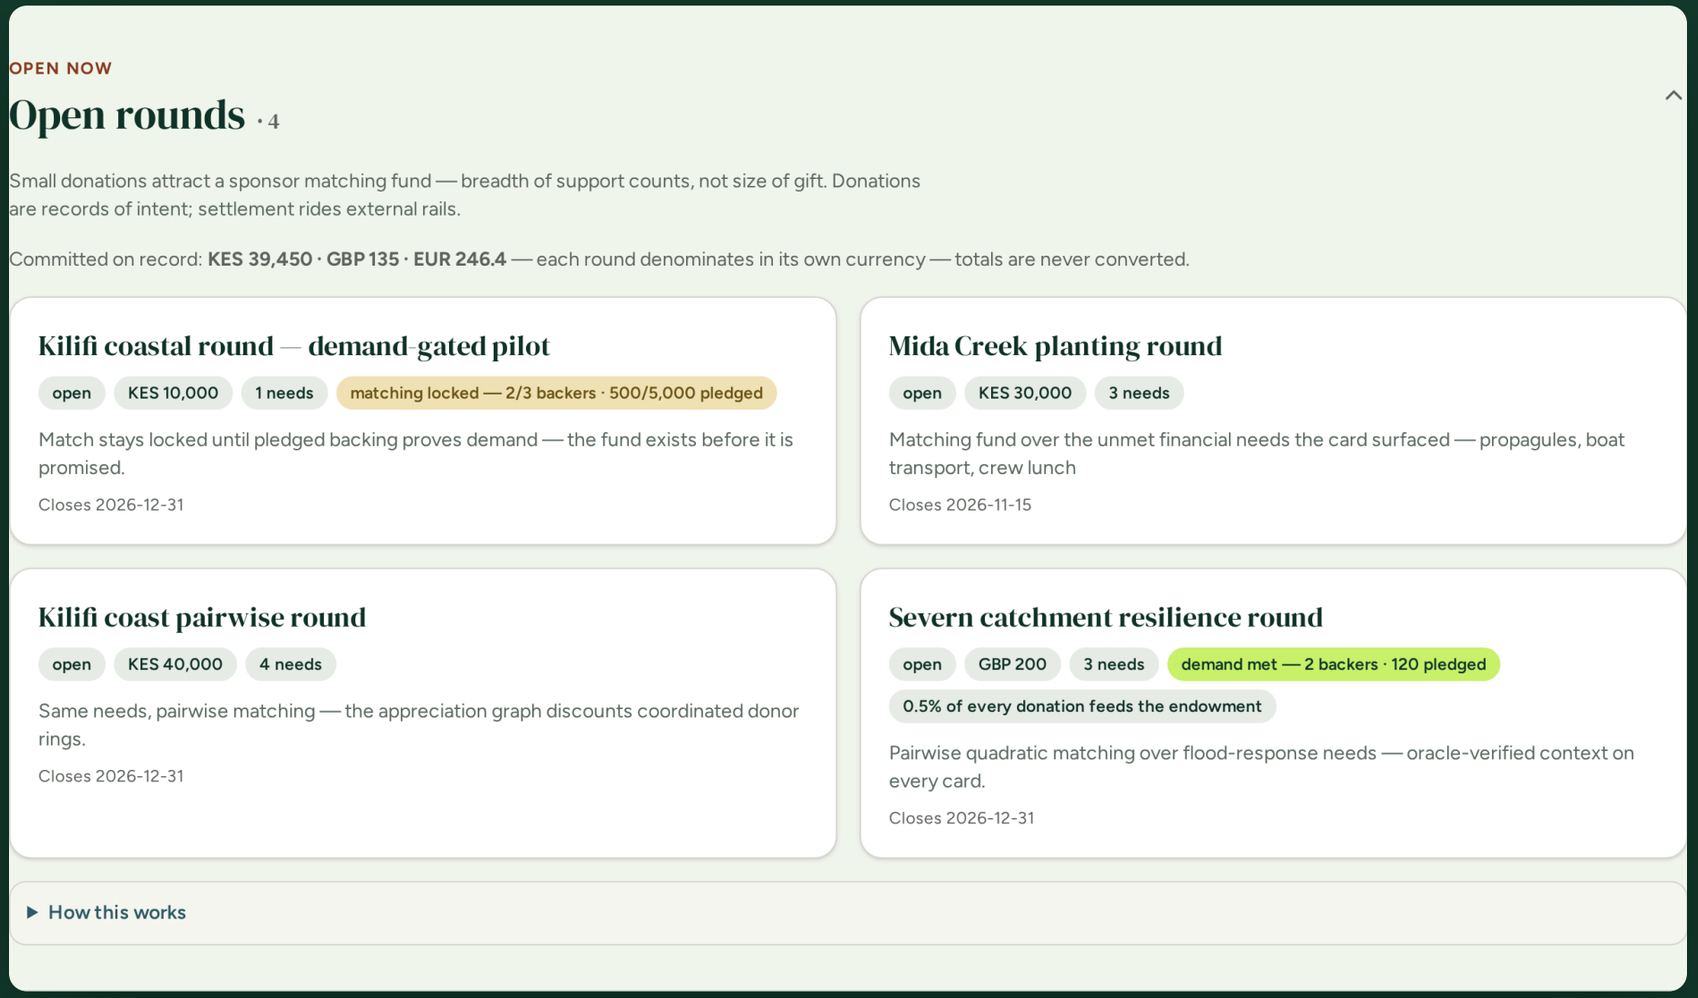

INDEPENDENT READINGS

Open-evidence readings · 508

Public data — satellites, sensors, registers — scored against the work. Evidence for review; human validation stays authoritative.

RESULT	SOURCE	TARGET	METHOD / CITATION	DATE
pending	atlas	Shoreline planting days — 1,200 propagules	envhealth-atlas deterministic model (SQL+published coefficients)	2026-10-27

5 · /impact#evidence — oracle checks + methodology citations.

6 · /fund#rounds — demand met vs matching locked, endowment.

← Fund

FUNDING ROUND

Kilifi coast pairwise round

Same needs, pairwise matching — the appreciation graph discounts coordinated donor rings. Matching fund: **KES 40,000** · state **open** · mechanism **pairwise (collusion-discounted) + conviction** · closes 2026-12-31 · 5 donations from 5 donors.

Match column = the round's allocation preview: $(\Sigma\sqrt{\text{donations}})^2$ per need, scaled to the fund. Ten small donors outweigh one large one — that is the point of the mechanism.

NEED	DONORS	GIVEN	MATCH	TOTAL	DONATE
400 more propagules to reach 1,200	3	15,600	29,469.84	45,069.84	your name · Amoui · donate
Boat transport to the planting site	1	3,200	5,265.08	8,465.08	your name · Amoui · donate
Lunch and water for 15 volunteers	1	3,200	5,265.08	8,465.08	your name · Amoui · donate
poss-demo-beach-clean-need-0	0	0	0	0	your name · Amoui · donate

7 · Pairwise + quadratic allocation — clique discount visible.

TRUST

Mutual recognition · 16

Trust counts only where it runs both ways.

Amina ↔ Brian — **4** × recognised each other
Amina ↔ Christine — **4** × recognised each other
Amina ↔ Daudi — **4** × recognised each other
Brian ↔ Amina — **4** × recognised each other
Brian ↔ Christine — **4** × recognised each other
Christine ↔ Amina — **4** × recognised each other
Christine ↔ Brian — **4** × recognised each other
Daudi ↔ Amina — **4** × recognised each other
Rhys ↔ Sarah — **3** × recognised each other
Rhys ↔ Tom — **3** × recognised each other
Sarah ↔ Rhys — **3** × recognised each other
